'HIDDEN DISABILITIES' IN THE WORKPLACE

This conference will take an in-depth look at lesser known conditions that affect people in the workplace. The day will feature presentations from a range of eminent speakers, including Professor Else Guthrie on medically unexplained symptoms and Professor Cary Cooper on organisational psychology.

The day will also feature a session on dyslexia from Nicola Newman, a leading advisor on age and disability, as well as Dr Owen Bowden-Jones, Honorary Senior Lecturer at Imperial College London, sharing his wealth of experience on mental health difficulties.

The conference programme has been designed to encourage delegates to participate actively and reflect on areas of practice that they find challenging. There will be two breakout sessions during the day where delegates will receive case studies and worked examples from other renowned presenters, on topics including: cancer sufferers; bipolar disorder; alcohol abuse; stress and depression; chronic fatigue syndrome; and diabetes in shift workers.

Manchester Conference Centre
